Subject: Microsoft Settlement"

I am agianst the goverment in this case agianst Microsoft.
Everyone knows microsoft is a monopoly, So what. We made then a monopoly.
What about AOL, The biggest and the worst service ,
I had them , They started Kicking me off line without any notice. I could be
in the middle of this Email and suddenly I would be off line, I finally
complained to them after being kicked off line 10 times in one day. The
first person I talked to Asked me how the weather was, and to check with my
phone company. After a few months of this I complained again. This time The
lady who answered me back, Must have gotten tired of me complaining as she
sent me a email That filled a complete page on my email, telling all the
details of how everything worked and all the possible causes of my problem.
She was being an ass, is this how they treat their customers.? I emailed her
back and said after I complete a college course to learn how to decipher her
message, I would give her a better answer, but until then ,if I was kicked
off the internet once more without First asking me if I wanted to continue
as they had previously done. Then I would no longer use the service,
I am now using Msn, and I can tell you that i can spend an hour or more on
line , Be inactive and still not get kicked offline.
I get a cd in the mail every one or 2 months, 11 last year offering free
hours on AOL., Turn on your tv and Aol is all over it with ads, How do they
pay for these mailings and ads, they raised their price for Aol, Now they
are suing Microsoft.
I hope TED Turner who now owns Netscape, and Aol, And Comp USA, and The
Atlanta Braves and who knows what, loses, because he is as much of a monopoly
as anyone in this country.
Microsoft gave Macintosh \$150 million dollars to keep them from going under,
and now they are doing pretty good,
What is Ted Turner trying to do, If he wins and destroys Microsoft, He can
then Bring in his own System and will own the stores that sell them. Does he
own a system, "Whos trying to Buy linux"
